

Alba announces the appointment of Acting Chief Operations Officer

Aluminium Bahrain B.S.C (Alba) announced the appointment of Dr. Abdulla Habib Ahmed as the Acting Chief Operations Officer (COO) with immediate effect, following the meeting of the Company's Board of Directors on Thursday February 08, 2018.

Dr. Abdulla joined Alba in 1995 as a Trainee Engineer. During the last 22 years, he has held various supervisory and management roles in Alba -- Superintendent Reduction Line (2002); R&D Manager (2009); Reduction Lines Manager (2011); Customers Technical Support Manager (2013); Director of Reduction Lines and Services (2015) and Director of Reduction Line 6 Start-up (2017).

Commenting on Dr. Abdulla's appointment, Alba's Chief Executive Officer, Tim Murray, said:

"At Alba, we believe that the key to our success is to develop and promote our people from within the Company then harness their true potential.

Abdulla has more than 20 years of diversified operations experience in Alba and showed great mettle during the Line 5 Recovery situation. His appointment as the acting COO of Alba comes at a notable time as we progress on the Line 6 Expansion Project and I am confident the Executive team will greatly benefit with Abdulla in the new position."

Dr. Abdulla attained PhD. degree in Chemical Engineering - Aluminium Smelting from University of New South Wales (UNSW), Australia in June 2016. He has an MBA from French Arabian School/ESSEC in addition to B.Sc.in Chemical Engineering.

About Alba

Aluminium Bahrain B.S.C. (Alba) - one of the largest and modern aluminium smelters in the world - is renowned for its premium grade aluminium products, technological strength and innovative policies, strict environmental guidelines and high track record for safety. Established in 1971 as a 120,000 tonnes per annum smelter, Alba today produces more than 981,000 metric tonnes per annum of the highest grade aluminium, with products including standard and T-ingots, extrusion billets, rolling slab, properzi ingots, and molten aluminium.

Alba is listed on both the Bahrain Bourse and London Stock Exchange, and the Company's shareholders are Bahrain Mumtalakat Holding Company (69.38%), SABIC Industrial Investment Company (20.62%) and the General Public (10%).

About Line 6 Expansion Project

Alba's Line 6 Expansion Project is one of the largest brownfield developments in the region. Expected to begin production by January 1st 2019, this Project will boost the smelter's per-annum production by 540,000 metric tonnes, bringing its total production capacity to 1.5 million metric tonnes per year.

With a CAPEX of approximately US\$ 3 billion, the Line 6 Expansion Project involves the construction of a sixth pot line utilising EGA's proprietary DX+ Ultra Technology, a 1,792 MW Power Station (Power Station 5) and other industrial services.

Bechtel is the EPCM contractor for the Line 6 Expansion Project smelter. For Power Station 5 (PS 5), GE and GAMA Consortium was awarded the EPC contract, while Siemens is the Power Distribution System contractor. J.P. Morgan, Gulf International Bank (GIB) and National Bank of Bahrain (NBB) are the Financial Advisors for this Project.

In June 2015, Alba Board approved the Line 6 Expansion Project and in November 2015, Alba secured the natural gas supply for this Project.

Alba successfully closed a US\$ 1.5 Billion syndicated term-loan facility comprising two tranches: Conventional Facility & and Islamic Facility in October 2016 as well as the first tranche of the Export Credit Financing of c. US\$ 700 million for Euler Hermes and SERV-covered facilities in July 2017. The Company is looking to secure the second tranche of the Export Credit Agency (ECAs) within the first quarter of 2018.

The Front End Engineering Design (FEED) study for the Project was completed in the first quarter of 2017. The construction site-works have started in the second quarter of 2017 while the mass earthworks was completed by the end of the third quarter of 2017 as per schedule. Alba has also laid the First Concrete in Potline 6 Foundation in May 2017 wherein the concrete foundations will reach 85,000 m3 upon completion by December 2018. The overall project progress to-date exceeded 36% (wherein engineering progressed more than 70% while contracts and procurement advanced by more than 80%).

The Line 6 Expansion Project will make Alba the world's largest single-site aluminium smelter and be a significant economic boost for the Kingdom of Bahrain due to the many co-investment opportunities through local and foreign aluminium investments.
