Batelco Expands its Salmaniya Datacentre with New Enhanced Services
****Upgrade and expansion to address Enterprise and Global customer demand**
for world-class DataCentre facilities **

Manama, Bahrain: Batelco, the Kingdom of Bahrain's leading digital solutions provider in line with its commitment to deliver the latest digital technologies and maintain business continuity for its Enterprise customers, has expanded its Salmaniya Datacentre facility.

Batelco embarked on the expansion and enhancement project to meet the growing demand from the Enterprise segment for cutting edge hosting solutions. In today's data intensive business environments, Batelco's expansion provides higher levels of overall capacity to meet the increasing demand for Datacentre and co-location services.

Batelco continuously enhances its services for business customers and develops its enhancement plans accordingly. As such, and alongside the expansion, Batelco has upgraded its current Datacentre capabilities with globally renowned services and systems. Companies who make use of the latest technologies in their business environments can now benefit from high power capacity racks and enhanced onsite support to meet their complex demands.

To better address the individual companies' requirements, the Batelco Datacentre now also provides companies with customised monitoring on their own environment and equipment. Businesses can now have total visibility of all the Datacentre elements at all times by having access to accurate information regarding temperature controls, power consumption, humidity levels, security protocols, and many more.

Because the Batelco Datacentre houses many regional and global multinationals, the facility has also introduced a state-of-the-art Video Conferencing solution to assist global customers with better communication solutions. This complements the array of services available such as an upgraded 24x7 available Network Operations Centre (NOC), as well as an overall expansion of the Datacentre's power and cooling capacities.

Batelco Bahrain Chief Executive Officer Eng. Muna Al Hashemi said that Batelco's enhanced and expanded Datacentre will provide business customers with ease of mind.

“Businesses who choose to host their equipment at our Datacentre are guaranteed to benefit from the most resilient, secure, and advanced hosting services in the Kingdom.”

“With all these advancements, the Batelco Datacentre continues to be regarded as the region’s leading technological facility, and this enables the Kingdom of Bahrain to attract many more international businesses,” Eng. Al Hashemi concluded.

For more information, business customers can contact their dedicated Account Manager directly while new customers may phone 1788 1144.
