

eAGM

What is eAGM?

eAGM is an innovative AGM service that enables issuers, investors, custodians, regulators, and other participants to participate in AGMs fully virtually or in a hybrid format with built-in voting capabilities. In today's unprecedented world, the eAGM service allows for significant cost reductions, ensure high accessibility from any location, satisfactory meeting all regulatory requirements, securely conducting Board elections, whilst ensuring higher shareholder engagement.

Through a web-based dedicated portal, investors, custodians, and regulators are able to access and participate in eAGMs from any location whilst accessing all the required documentation related to AGMs.

Main Features
